## Section 4 : First Aid Measures.

### 4.1 Description of First Aid Measures:

**Inhalation:** If symptoms are experienced, move victim to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.

**Eyes:** Immediately flush eyes with water for 15-20 minutes, while holding eyelids open. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Seek medical attention at once.

**Skin:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**Ingestion:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

### 4.2 Most Important Symptoms and Effects, Both Acute and Delayed:

**Inhalation:** Mists and vapors can irritate the throat and respiratory tract. High vapor concentrations may cause central nervous system effects. Symptoms may include headaches, dizziness, and drowsiness. Harmful if inhaled.

**Eyes:** Causes burns and may result in permanent injury to eyes including blindness.

**Skin:** Causes corrosive burns. Brief exposures may cause irritation and defatting of the skin. Exposures not promptly washed off may lead to toxic effects similar to ingestion. Harmful if absorbed through the skin.

**Ingestion:** Ingestion can cause gastrointestinal irritation, swelling of the larynx, difficulty in breathing, circulatory shock, convulsions and possibly death.

### 4.3 Special Treatment Needs:

**Special Needs:** Probable mucosal damage may contraindicate the usage of gastric lavage.

## Section 5 : Fire Fighting Measures.

### 5.1 Extinguishing Media:

Dry chemical, foam, carbon dioxide, water fog or any other agent suitable for surrounding fire.

### 5.2 Specific Hazards Arising from the Chemical:

Irritating or toxic gases or fumes may be released during a fire.

### 5.3 Special Protective Actions for Fire-Fighters:

Fire fighters should wear full protective clothing including self-contained breathing apparatus. Cool fire exposed containers with spray.

## Section 6 : Accidental Release Measures

### 6.1 Personal Precautions, Protective Equipment and Emergency Procedures:

Keep unauthorized personnel away. Stay upwind. Eliminate all ignition sources in immediate area.

### 6.2 Environmental Precautions:

Prevent entry into waterways sewers, basements or confined areas.

### 6.3 Methods and Materials for Containment and Cleaning Up:

1. Isolate spill or leak area immediately.
2. Ventilate closed spaces before entering.
3. All equipment used when handling the product must be grounded.
4. Floor will be slippery. Do not touch or walk through spilled material.
5. Stop leak if you can do it without risk.
6. A vapor suppressing foam may be used to reduce vapors.
7. Absorb or cover with dry earth, sand or other non-combustible material and transfer to containers.
8. Use clean non-sparking tools to collect absorbed material.

## Section 7 : Handling And Storage

### 7.1 Precautions For Safe Handling:

Avoid contact with skin and eyes. Use good personal hygiene practices. Wash hands before eating, drinking, smoking, or using toilet facilities. Wash thoroughly after work using soap and water.

**Hygiene Advice:** Do not eat, drink or smoke around product.

### 7.2 Conditions For Safe Storage:

keep the container tightly closed and in cool well-ventilated place. Keep from freezing. Do not handle or store near an open flame, heat or other sources of ignition. Prevent electrostatic charge buildup by using common bonding and grounding techniques.

## 8.2 Engineering Controls:

Provide adequate local exhaust ventilation (explosion proof) to maintain worker exposure below exposure limits.

## 8.3 Protection Measures:

- **Individual Protection Measures:** Wear protective clothing to prevent repeated or prolonged contact with product. Protective clothing needs to be selected specifically for the workplace, depending on concentrations and quantities of hazardous substances handled. The chemical resistance of the protective equipment should be enquired at the representative supplier.
- **Hygiene Measures:** Facilities storing or using this material should be equipped with an eyewash station and safety shower. Change contaminated clothing. Preventive skin protection is recommended. Wash hands thoroughly after use, before eating, drinking or using the lavatory and at the end of the workday.
- **Eye/face Protection:** Wear tightly fitting chemical goggles and a face shield (8-inch minimum).
- **Hand Protection:** Wear gloves recommended by glove supplier for protection against materials in section 3. Gloves must be inspected prior to use. Gloves should be impermeable to chemicals and oil. Breakthrough time of selected gloves must be greater than the intended use period. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product.
- **Other Protective Equipment:** Wear impervious, protective chemical resistant clothing including boots, gloves, lab coat, apron or coveralls as appropriate to the situation to prevent skin contact. Eye wash fountain and emergency showers are recommended.
- **Respiratory Protection:** Always use an approved respirator when vapor/aerosols are generated. Where risk assessment shows air-purifying respirators are appropriate use a full-faced respirator with multi-purpose combination.
- **Environmental Exposure Controls:** Do not empty into drains.
